IF a good davenport will make your living room a better place to enjoy life in, here's a good item to consider.

The price is low for this piece; there are, of course, lower priced davenports than this. But we think you will not find better value than this. Every dollar of the price is represented in the furniture.

In fact, the excellent quality-"Scholle-quality"-gives every dollar of the price an extra value. It's a very fine example of furniture making, in design and in construction; covered with sateen, so you can later select a richer fabric. The part of it that's covered up by the upholstery is as good as the part you can see!

The chair shown is another good one; the idea of davenport and chair to match isn't as common as formerly. Variety is now the favored idea. L. ALEKSEL PRESIDENT

sional status. So have all the other great players As amateurs they have not been taking a little ime off to play tennis. They have been living tennis virtually the year around.

One of the essential differences in sport is that the amateur takes a little time off to give to it as a diversion and the professional gives all his time to it as a means of living. In most sports there cannot be any fair competition between the two. No amateur boxer can hope to be good against a professional. Golf is an exception, but in tennis none of the amateurs have been anything in habit of life other than professionals.

Suzanne the professional is Suzanne the amateur in everything except taking money for her stuff. She is no worse match for Helen Wills now than she was before. Mr. Pyle may have started something, unless Suzanne changes her mind and runs out on him.

Chicago, July 30. - The wails about bells and foghorns and like necessities are, first of all, a confession from the writers that they are not masters of themselves. Would not these writers benefit both themselves and the human bundle by learning self-government and control? Chicago, July 31.—Allow me to express to you our thanks for the brilliant idea you had when you asked Mr. Bennett to write about the historical places of our neighborhood. We are reading him before we glance at anything else. He is the very man to do it; he has imagination combined with sympathy for all that is good and beautiful. I still treasure an article he wrote years ago on a playlet, "The Fountain" it is a gem. Thank you once more for both a gem. Thank you once more for subject and writer.

SO

A new Queen reigns where Ice was king!

HEY have crowned a new queen in the domain where it must always be cold.

Ice was King for years . . . and he was a good King, in his day. But he could not meet the demands of progress. New needs and new desires, and a better understanding have placed a

new sovereign on his throne. Constant cold, lower than Ice could give, was needed . . . and Ice Maid, the new Queen, supplies it. The people demanded freedom, less worry, less work ... and Ice Maid gives all that they asked.

Refrigeration made perfect, all the uncertainties and complications left out! It keeps foods fresher, and

longer, with more economy, health and cleanliness.

You can freeze ice cubes, eight dozen at a time. You can make delightful frozen desserts and dainties. Your ice box—the one you have at present—can become your useful servant, for less than the cost of ice.

Ice Maid comes to you direct from its maker, who sells, installs, and guarantees it. Fifty years of engineering and manufacturing experience are behind it.

You can buy the Ice Maid on easy terms, as you now buy ice. Phone or write for further information. Better still, call and see it in operation.

OilHeat

The one obstacle to the far wider acceptance of oil heat for homes is the cost of fuel consumption. This has been needlessly high because oil burners-even the best and most efficient-are seriously handicapped when used in boilers designed not for oil but for coal.

Oil burners are perfected; and oil heat, in spite of its higher cost, is everywhere accepted as the ideal heat for homes.

Until Bryan contributed the first oil-burning boiler, it was not possible to get the best out of any oil burner, nor to realize the full economy which oil-burning is intended to achieve.

The Bryan Oil-Burning Boiler, because it is designed expressly for oil heat, saves 30 to 50 percent in oil consumption, thus bringing the cost of oil heat actually below that of coal.

The Bryan Oil-Burning Boiler

The remarkable economy of the Bryan Oil-Burning Boiler is the result of its specialized design and construction which conform perfectly to the special require-

In the first place, there is built into the Bryan Oil-Burning Boiler a scientifically correct combustion chamber for the proper combustion of the oil. This, by the way, is an exclusive Bryan feature.

The boiler itself is a nest of durable copper tubes ingeniously arranged in the direct path of natural heat travel—on the principle of the familiar hot water heater. By using copper tubes, closely intertwined, instead of heavy cast iron walls as in the ordinary coal boiler, the effective heating surface is greatly enlarged, the circulation of water is tremendously accelerated, and the water is heated, or converted into steam, in one-fifth the time required in an ordinary boiler.

Hot water for household use costs 50 per-cent less with the Bryan Oil-Burning Boiler. A special hot water coil does away with the costly separate water heater and provides abundant hot water all the year

The Bryan Oil-Burning Boiler with its re-markable efficiency costs no more than the ordinary boiler. It actually pays for itself

Here is a marvelous new way to wash dishes and clothes-the Chipso way!

Quicker, easier, pleasanter!

No more rubbing soap on your dishcloth over and over, and rubbing it on the dishes and rubbing it off again. No more chipping and melting of cake soap to make suds in the washtub. No more washboard rubbing of clothes. No more every-week boiling.

Instead—a little Chipso in your pan or tubsome hot water, and there you have suds! Fine, foamy, lasting suds which dissolve the grease and dirt you used to rub away.

Chipso is the wonderful new Procter & Gamble household soap. Quick, safe, economical. Flaked for instant suds. The perfect soap for all cleaning and washing. It soaks the clothes and dishes clean.

See it at your grocer's today—in big blue-andorange packages sealed tight against dust. To try it, buy the 10c size. Then, for regular use, buy the big size. It makes all washing and cleaning easier. PROCTER & GAMBLE

1. An advertisement in The American Magazine has the power of Sixty-Six Million Circulation-Days-the greatest power that can be given it in any general monthly or weekly magazine.

2. In most towns of 1,000 or more population The American Magazine has more circulation than any other general monthly or weekly magazine. 3. Everywhere The American Magazine parallels your market opportunity to an unusual degree. Its circulation by counties closely follows the distribution of income tax payers, retail outlets, auto owners, and home owners. And it reaches all classes of people in proportion to their market

4. Numerous house-to-house investigations have shown that The American Magazine is read by all members of the family that influence consumption -fathers, mothers, and young people.

5. The things that people read in The American Magazine stimulate them to better living—to a fuller, richer life. For years its unusual reader responsiveness has been known to those advertisers who could trace this through direct returns.

Exit the selling "game

Some people still call it the "selling game."

If it ever was a game, it isn't today. It's a business—and a serious one.

A business requiring more study, more training, more knowledge than ever before. Because it, is constantly developing new problems-new angles.

A new dealer angle

For instance, there is the dealer's interest in National Magazine Advertising.

"What is your firm doing to make people want your products?", he asks.

A natural question. Every alert merchant knows that profits depend upon how much people want the merchandise he stocks.

(And that, by the way, goes for yourself and your firm. You, in the long run, can't write orders any faster than the dealer rings up sales.)

Can you answer?

It's part of today's salesmanship to be able to answer questions like this.

To show the dealer how your firm is stimulating the desire of people for your

He will be interested, for example, in the fact that your product, if it is advertised in The American Magazine, has behind it the greatest single force for increasing merchandise consumption-for making people want and buy goods-in America.

He will be still more interested when you get down to cases and give facts and figures for his own town.

Where to get them

To supply you with these facts and figures for all towns of 1,000 or more population, and for all counties, we have published the Vest Pocket Sales Manual.

It localizes each of the points mentioned in the column above.

For instance, the fifth point. You, as a salesman, are familiar with the personal appeal of The American Magazine. You know that it has an unusually strong hold upon its readers—that these readers are naturally more responsive to advertisements appearing in its pages than those of any other magazine.

The Vest Pocket Sales Manual enables you to dramatize this fact for dealers—and to back it up with local proof.

It enables you to answer in terms that the dealer will understand, such questions 25: How many local homes does The American Magazine reach? How long does each issue stay in each home? What members of the family read it?

THE thrill of discovery may be yours if you enter Yellowstone Park this year through the great, new Gallatin Gateway, opened to the wide world August 1st by the Chicago, Milwaukee & St. Paul. Few human eyes, save those of Indians, have explored this wonderful trail southward from Three Forks, Montana, where Lewis and Clarke discovered the source of the mighty Missouri. Yet you may now enjoy it, traveling in greatest comfort. Big game still range freely among mountains 10,000 feet high; bear, elk, cougar, wolf, mountain sheep and goats. And the brawling streams teem with trout.

You need only eight days for the round trip from Chicago through the rugged Gallatin Canyon, and the glories of Yellowstone Park! Gallatin Gateway is the only entrance to Yellowstone opening direct from the trunk line of a

transcontinental railroad. No branch line travel! Yellowstone Park Motor Coaches will meet "Milwaukee" trains at Three Forks, in the electrified district, for the complete tour. Old Faithful Geyser is your first stop on this interesting trip.

If you want to continue to the Coast, summer fares are surprisingly low. When you return from the Park tour, step once more aboard one of the world-famous "Milwaukee" transcontinental trains and speed on to Puget Sound across four glorious mountain. ranges, including the Rockies. A DRAG on your jimmy-pipe, loaded to the guards with Prince Albert, will give you an entirely new idea of how good a pipe can taste when you put it on the proper diet. It will revise all your notions about the grand old pastime of pipesmoking. Make the test!

This very day, get yourself a tidy red tin of P. A. and tuck a load into the business end of your pipe. Light up and pull that wonderful smoke up the stem. Notice how cool it tastes, whether you feed it fast or slow. Notice how sweet and mellow it is.' Good old P. A.!

When you open the tin, the aroma that greets you is richly fragrant . . . the breath of real, honest-to-goodness tobacco. An aromatic promise of the smoke-pleasure to come. You'll never forget that taste when you light up. Nothing else is like it anywhere.

No matter how satisfied you think you are, give P. A. a whirl in your jimmypipe. Millions of smoke-happy men will tell you that P. A. will give you more pleasure to the cubic inch than any tobacco you ever smoked. There's a P. A. sunshine-shop just across the way!

METAL MARKETS.

An investment error

is never obvious to its maker

"WHAT would you suggest to balance this list?" an investor asked. His desire for safety had led him into the obvious error of buying nothing but highly marketable, listed bonds. They were sound, but subject to taxes that materially decreased his yield.

The Compton Company recommended that he balance his holdings with a fair proportion of Joint Stock Land Bank bonds, which are just as marketable, and, being non-taxable, increased his yield, and even added to his margin of safety. It is the experienced outside viewpoint that does discover not only the obvious, but also the obscure errors in investment judgment. In thirty-eight years William R. Compton Company has helped many investors to better their position. Compton service, with a national reputation

An abrupt let up in shipping demand and sharp declines at most outside hog markets were weakening influences. Packers are in a bearish mood, saying there is a surplus of high priced products obtained from hogs slaughtered at the high point about a month ago. As usual heavy mixed composed a big percentage of the offerings, a big share selling at \$9.65@10.00 and heavy packers down to \$9.25. COFFEE MARKETS.

CONSIDER, for a moment, \$1,000 of your money. Compounded at 4%, it will, in twenty years, amount to \$2,222. Compounded at 6% it will amount to \$3,310. Compounded at 9% it will amount to \$6,009.

Other things being equal (particularly safety), you'd naturally rather have, at the end of twenty years, \$6,009 than \$3,310 or \$2,222.

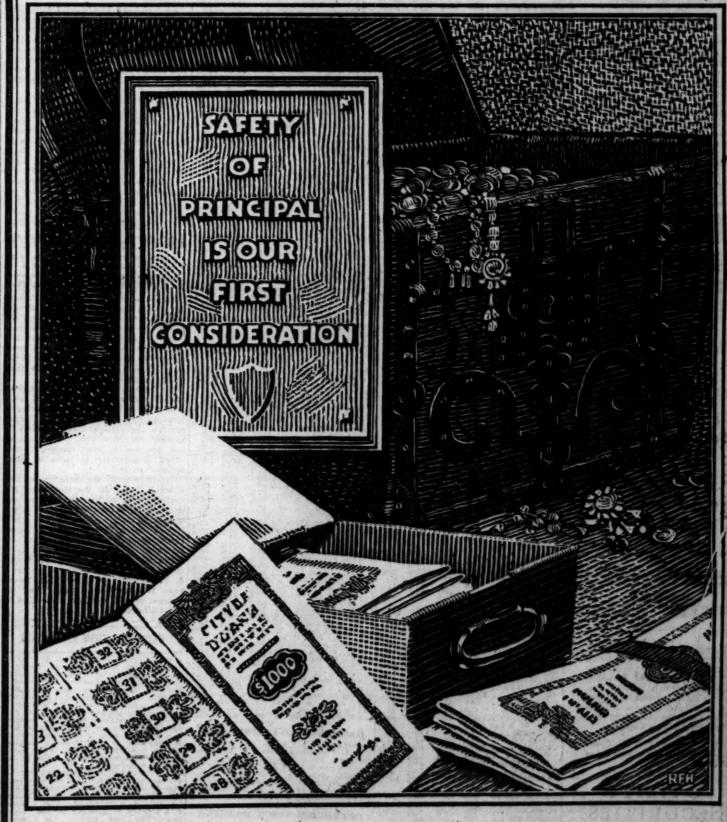

If, therefore, you could obtain a security which would meet your most exacting requirements and which would give you a return of 9%, you would seriously consider putting at least part of your money into it, wouldn't you?

Cities Service Common stock is such a security. When you buy it at its present price it will give you, with unusual protection for your money, a yield of about 9% in cash and stock dividends.

Bonds Are Better Than Hoarded Treasure

The most desirable form of an investment should provide safety for the funds employed, and certain income which can be devoted to increasing the total of the investment. Carefully chosen bonds, selected in accordance with the principle that safety is the first consideration, most nearly fulfill these exacting requirements.

Circulars describing Government, Municipal, Railroad, Public Utility, and Industrial Corporation Bonds bearing our recommendation furnished on request.

Binders have just started humming in this part of the state and there already are calls at labor employment offices for hundreds of men a day.

From the office at Fargo 150 men are being sent to the fields each day and this office expects to send out an average of at least 100 men every day for two of three weeks.

Ranchers started out paying \$3 a day and within the last few days have jumped up to \$3.50 a day. It is likely they will have to pay \$4 during thrashing season. Employment agencies in the grain belt centers of the state expect to send out from 800 to 1,000

men a day for the next few weeks.

There is now a healthy surplus of men ready to go into the fields as shockers at the wages offered but there is every indication that many more will be needed than are in sight.

Standards

CERTAIN definite standards of conser- standards for which we have striven, withvatism and sound policy are essential to the successful conduct of a permanent investment business.

The careful investor naturally seeks to deal with a securities house that maintains the highest standards and that never deviates from those standards.

The organization of Lawrence Stern and Company represents the embodiment of certain definite, conservative standards in the investment field. We are building for the future; and it is the undeviating policy of this house to adhere to the high out exception and without change.

We believe that the intelligent investor appreciates and approves the maintenance of such standards; and it is to such in-vestors that this house appeals.

We have available at this time a very carefully selected list of sound securities all of which meet the strict requirements set by the standards of this house. These offerings include real estate, municipal, railroad, industrial, public utility, and equipment trust securities. We shall be glad to send this current list to any in vestor upon application.

Which Shall It Be This Winter-Oil or Coal? DECIDE NOW!

If you are a home owner you know the annoyances and inconvenience of coal. Ashes to be carried out. A grimy basement. At least a two-a-day performance with the coal shovel. Floors tracked with dirt. Soiled drapes. Smoke. Soot. Uneven heat.

Nor can you deny the advantages of oil. It is clean. Keeps the whole home clean. Makes the basement a livable place. It is convenient. Properly burned, it supplies even heat in any desired quantity, day or night. Why not decide, RIGHT NOW, to relegate coal to the limbo of things forgotten?

If you have already made this wise decision and are now considering the installation of an oil burner, investigate the SUPERIOR OIL BURNER.

With the advent of the SUPERIOR, five years ago, a new chapter was written in oil burner history. Home owners who had thought of an oil burner as perhaps a some-day possibility found, upon investigation, that the cost of a SUPERIOR installation complete was so reasonable as to place it easily within their immediate means.

But sales were by no means confined to those in merely moderate circumstances. Many families who were financially able to afford any oil burner gave the SUPERIOR the decided preference after a careful investigation. Many architects recommended the SUPERIOR to home builders.

"The Burner of No Complications"

When you see a SUPERIOR in operation the reason for its ever increasing popularity becomes readily apparent. You will not wonder why, with so many home owners, it is given the preference.

Its simplicity of construction combined with its high degree of efficiency cannot fail to impress you. The SUPERIOR has no moving parts—there is nothing about it to get out of order.

All you see is a valve which regulates the flow of oil to the burner; and a peep inside reveals a mass of white-hot flame that burns continuously with any degree of intensity required to create any degree of temperature desired.

Because of its independence of any outside agency such as electricity, gas or water for its operation, the SUPERIOR is absolutely dependable. It is Foolproof and Trouble-free.

Neither a Power Nor a "Gravity" Burner

Had you decided upon the installation of an oil burner or some other mechanical device. some six years ago, you would have found your choice restricted to two general types—the power and the

In most power burners the oil is broken up into fine particles-atomized-by means of a motor-driven fan, Power burners require electricity and gas to operate. The SUPERIOR requires neither gas nor electricity. Most gravity burners merely burn the raw oil as it flows over a hot plate. The SUPERIOR completely vaporizes

the oil, burning only a vapor gas.

A Natural Draft Vaporizing Burner

In the SUPERIOR the oil is broken up by heat into a vapor mist of much finer particles than is possible by any mechanical means before it leaves its outlet in the fire bowl. There it is thoroughly mixed with air forming a highly combustible gas. Combustion is at grate level where it was intended to be by the furnace or boiler manufacturers.

Valve

Retire at night when a blizzard is at its worst without fear that something may go wrong and the fire go out.

Leave the house at any time with the assurance that it will be at the same temperature when you return.

The SUPERIOR burns continuously-easily controlled by hand or automatically controlled by thermostat. That is the kind of heat comfort the SUPERIOR unfailingly provides throughout the entire heating season. And it is all so simple that a child of ten can operate it.

Before you lay in a ton of coal—before you come to a final decision as regards your purchase of an oil burner-again we say: INVES-TIGATE THE SUPERIOR. Its simplicity of construction and ease of operation will appeal

to your sense of practicability no less than will its moderate cost appeal to your sense of true economy. A few minutes' demonstration will prove to you convincingly, more than any other way, that the SUPERIOR is ideally adapted to your particular needs.

All successful oil burner manufacturers will have more orders than can be installed during the few weeks preceding cold weather. Delay in making your decision may mean disappointment if you hope to enjoy oil heating comfort this winter.

they had taken their seats at the little table set in a secluded alcove two other people entered the place.

Came first a pretty woman, flaxen haired and pink cheeked, a trifle volup tuous in figure, perhaps not too young, but her thirty-odd years were not unduly apparent. Richenda eyed her approvingly. She liked the little dimples that stole about the wide, laughing mouth. She did not notice a queer, cold hardness about the blue eyes—something that was not quite at one with the

miling gavety of those crimson lips. The woman was carefully corseted beneath the sleek plainness of her infully cut black satin dress, her bare arms were soft with expensive power. From her neck half way down to her knees, strung at odd intervals on a platinum chain, hung bizarre red wooden beads. Others dropped from the hidden lobes of her ears. Richenda eyed her curiously. The woman reminded her vaguely of Agatha Johnley, the pretty widow who had "gathered eyes' aboard the steamship Tibetan and who was now en route for Natal.

Mrs. George M. Whitefield of Evanston, widow of one of the pioneer members of the society, offered a chair which her husband had used.

Another offer came from Dr. August Peccaro, 1201 West Chicago avenue, and being found a trifle more suitable than the first, was selected by the committee, and turned over to the United Charities for transportation to the camp.

"We trist the new equipment will expedite the work of the full time dentist at Camp Algonquin," Dr. Harold S. Smith, chairman of the society's public service committee, said in notifying The Tribune of the glift. "When the camp was first opened, members of our organization were glad to cobperate in carning for the children Minutes spent by these children in the dental chair will save hours of work when they are grown."

TRIBUNE COOK BOOK

BY JANE EDDINGTON. Seven Minute Icing.

A correspondent asks among other things about the seven minute icinghow to proceed—and it is not the first nquiry that has come this way concerning this icing. She puts her trouble thus: "I cannot make a success of leing made by putting the white of an egg, three tablespoons of cold water and seven-eighths of a cup of sugar into a double boiler and beating seven minutes. Should I begin ceating at once, or wait until the mixture boils?"

First it does not boil, and our assistant in our experimental kitchen wrote out the method thus, after working it out afresh so that we might note with great minuteness how to succeed, but she used hot water, not cold; measure water and put in top of double boiler over boiling water. Add the sugar slowly with stirring until most of it is dissolved. Then break in the egg white and begin beating at once with a rotary egg beater, that is, Dover type of beater. Beat for seven min-It will become thick by this Now remove from water and pour out into a bowl. Beat with a wooden spoon until cold and thick enough to hold its shape. When the egg is strictly fresh the icing will reemble marshmallow filling.

And then my assistant wrote: "Some

Today Is Last Chance to Get In on Sally's Party at Theater BY SALLY JOY BROWN.

What would you think, girls and, boys, if you heard four saxophones playing together, and then saw that only one person was playing them? Pretty clever, wouldn't you think? That's just one of the special acts

you will see when we have our party at Majestic theater Aug. 12, a week from tomorrow. The Marintba duo have invented this marvelous effect, played by one man and sounding like four saxophones. It's one of the many reasons why you won't want to miss out on the party If you haven't sent your letters al-

ready you still have today in which to do it. I pick the winners tomorrow morning, so your letter, if mailed to day, will reach me in time. Then the hundred letters that show me the girls and boys who wrote them will enjoy the party most will win the invitations. No more Shiny nose!

Evenings by appoin

Here is a chance to prove for yours that you CAN get rid of that shi look which ruins so many complexio Interview of the part of the shiny look which ruins so many complexions. A wonderful new cream called Vauv does it! Put it on in the morning, powder over it—and for hours your mose will keep just that dull, velvety look you want it to have. One girl says: "I have tried nearly every cream on the market, but Vauv is the first one that really does get, rid of shiny nose. The longer I use it the less I have to powder. My skin seems to get smoother every day, and blackheads have disappeared. Try it for yourself. Go to any drug or department store and get a 30c tube of VAUV. Use it for one week as directed. Then, if you are not entirely satisfied, mail me the tube and I'll refund your money and postage.

Be free at last from that worst of all skin blemishes—an oily, skiny nose! Jame Mortal, well as the standard of the world and plantage of the postage.

Wash your face gently with Palmolive Soap, massaging it softly into the skin. Rinse thoroughly, first with warm water, then with cold. If your skin is inclined to be dry, apply a touch of good cold cream.

Do this regularly, and particularly in the evening. Use powder and rouge if you wish. But never leave them on over night. They clog the pores, often enlarge them. Blackheads and disfigurements often follow. They must be washed away.
